

Static Web Site (basic)

When to use:

- * Content changes are not frequent (cache and F5 required)
- * Page load and Google optimization is important
- * Lightning fast load times
- * Create custom content and documents
- * Folder level access model
- * Online only

Dynamic Web App (advanced)

When to use:

- * Content changes are frequent - must reflect changes immediately for users
- * Small database systems
- * Lightening fast load times
- * Create custom content and documents
- * Advanced custom security models
- * Online and Offline support
